

HDPE CAN LINERS

High molecular weight, high density can liners

* **HDPE Resins**

Feature a unique blend resins for superior puncture resistance and superior tear strength. Eliminates problems experienced with other high density bags

* **Star Seal Bottom**

Creates a leak-proof seal to handle wet refuse, distributes the load weight evenly to maximize carrying capacity and eliminates broken seals

* **Economically**

Less raw materials means a less expensive bag

* **Environmentally**

Source reduction means less raw materials consumed which means less resources extracted

* **Convenience**

Compact coreless rolled bags fit anywhere conveniently on janitor's cart. 30 gallon at larger bag dispenser without tearing off the roll. High density bags save labor, janitor does not have to struggle to separate Hi-D bags as with regular poly bags which cling to each other

* **Warehouse**

Less storage space required since boxes are smaller

SIZE CAPABILITIES

HDPE Custom Capabilities

Minimum Width :	17"	Minimum Mil Thickness:	Approx. 0.00023"
Minimum Length:	Approx. 18"	Maximum Mil thickness	Approx. 0.00157"
Maximum Width :	52"		

HDPE CAN LINERS (High Molecular Weight, High Density Can Liners)

REMARKS: A) BOTTOM SEAL: ABOVE ALL ARE STAR BOTTOM (NO FLAT, NO GUSSET)
 B) PACKING: 64 CASES PER PALLET
 C) ABOVE ALL ARE BAGS ON ROLL
 (NEED A MIN. 64 CS PER SIZE PER RUN FOR FLAT/BULK PACK- BIG SIZES ONLY)
